Department of Food Science Website (<http://food-science.uark.edu/>)

Brewing Science Certificate of Proficiency Website (<https://brewing.uark.edu/>)

Food science is an interdisciplinary field involving microbiology, engineering, biochemistry, nutrition, and sensory science to better understand food processes and improve food products for the general public. As the stewards of the field, food scientists study the physical, microbial, and chemical makeup of food. They apply their findings to develop the safe, nutritious, and sustainable foods and innovative packaging that line supermarket shelves daily.

Food science prepares students for many interesting, rewarding and challenging professional career opportunities in industry, business, governmental and educational organizations associated with food and food-related products. Due to the diversity and abundance of opportunities available, students graduating with a B.S.A. in food science readily obtain employment in the food industry or continue studies for graduate school. Additionally, requirements for several pre-professional programs can be fulfilled while meeting requirements for the food science degree.

Students may choose one of three areas of concentration for their degree program: Food Science (FDSC), Food Technology (FDTN) or Food and Culinary Sciences (FDCU). The FDSC concentration at the University of Arkansas is one of only 43 programs in the United States and the only one in Arkansas that is approved by the Institute of Food Technologists. It provides students with a strong background in basic and applied sciences and food chemistry, microbiology, engineering and quality control.

The food we consume daily is the result of extensive food research, a systematic investigation into a variety of foods' properties and compositions. After the initial stages of research and development, food products are mass produced using the principles of food technology. The FDTN concentration provides students interested in food industry careers with a multidisciplinary education consisting of core food science requirements in combination with a minor chosen by the student to compliment the student's career goals.

Culinary sciences blend the artistic abilities of culinary arts with the scientific expertise of food science to shape the future of research and development in the food industry. The FDCU concentration provides students interested in product development careers with an interdisciplinary background in food science and culinary arts. This concentration is a partnership program with Northwest Arkansas Community College (NWACC). Students complete their culinary arts coursework at Brightwater: A Center for the Study of Food (an academic division of NWACC located in Bentonville, AR) and are eligible to

receive a Certificate of Proficiency in Culinary Arts from NWACC with no additional coursework. Culinary coursework will be transferred to the UA; it can be taken prior to admission to the UA or taken while in residence at the UA. Food and Culinary Sciences concentration will provide students with the course work necessary to be eligible to become a Certified Culinary Scientist through the Research Chef's Association.

Students in each concentration are required to complete a relevant internship. There are also ample opportunities for students to gain research and international experiences and to select a minor.

Requirements for B.S.A. in Food Science with Food Science Concentration

Major Requirements

State minimum core (<http://catalog.uark.edu/undergraduatecatalog/gened/stateminimum/>) and discipline-specific general education requirements: (Course work that meets state minimum core requirements is in bold.)

Communication (12 hours)	12
ENGL 10103	Composition I (ACTS Equivalency = ENGL 1013)
ENGL 10203	Composition II (ACTS Equivalency = ENGL 1023)
Select two courses from approved list of communication intensive courses	
U.S. History and Government (3 hours)	3
Select 3 hours US History from University Core	
Mathematics and Statistics (6 hours)	6
MATH 11003	College Algebra (ACTS Equivalency = MATH 1103)
MATH 21003	Principles of Statistics (ACTS Equivalency = MATH 2103)
Physical and Biological Sciences (23-27 hours)	23-27
BIOL 10103 & BIOL 10101	Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)
BIOL 20003 & BIOL 20001	General Microbiology (ACTS Equivalency = BIOL 2004 Lecture) and General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)
CHEM 14103 & CHEM 14101	University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture) and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)
CHEM 14203 & CHEM 14201	University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture) and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)
CHEM 38103	Elements of Biochemistry
CHEM 26103 & CHEM 26101	Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture) and Organic Physiological Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab)
or CHEM 36 Organic Chemistry I & CHEM 36 and Organic Chemistry I Laboratory & CHEM 36 and Organic Chemistry II & CHEM 36 and Organic Chemistry II Laboratory	
Fine Arts and Humanities (6 hours)	6
Select 3 hours Fine Arts from State Minimum Core	

Select 3 hours Humanities from State Minimum Core	
Social Sciences (9 hours)	9
Select 9 hours Social Sciences from State Minimum Core	
University Requirement (1 hr)	1
UNIV 10051 University Perspectives	
Food Science Degree Requirements (32 hours)	32
FDSC 10101 Exploring Topics in Food Science	
FDSC 11003 Introduction to Food Science	
FDSC 25203 Sanitation and Safety in Food Processing Operations	
FDSC 31003 Principles of Food Processing	
FDSC 32002 Introduction to Food Law	
FDSC 41103 Food Analysis & FDSC 41101 and Food Analysis Lab	
FDSC 41202 Food Microbiology & FDSC 41201 and Food Microbiology Lab	
FDSC 43004 Food Chemistry	
FDSC 4310V Internship in Food Science	
FDSC 44103 Sensory Evaluation of Food	
FDSC 47103 Product Innovation for the Food Scientist	
21 hours from concentration requirements (FDSC, FDCU, FDTN)	21
General Electives	3-7
Total Hours	120

Additional Requirements for Food Science Concentration (21 hours)

Total Hours	14

Food Science B.S.A., Food Science Concentration Nine-Semester Degree Program

Because the Food Science Concentration requires an internship one summer, students cannot enroll in an Eight-Semester Program. See the Eight-Semester Degree Policy (<http://catalog.uark.edu/undergraduatecatalog/academicregulations/eightsemesterdegreecompletionpolicy/>) for requirements of the eight-semester programs.

First Year	Units		
	Fall	Spring	Summer
UNIV 1001	1		
ENGL 1013 (Satisfies General Education Outcome 1.1)			
MATH 1203 (Satisfies General Education Outcome 2.1)			
Satisfies General Education Outcome 3.4:			

BIOL 1543 & BIOL 1541L	0

State Minimum Core in Fine Arts; Humanities; Social Science; or U.S. History or Government ^{1, 2, 3, 4}		3	
Year Total:	12	13	

Total Units in Sequence: 88

- ¹ The Fine Arts Elective courses which satisfy General Education Outcome 3.1 include: ARCH 1003, ARHS 1003, COMM 1003, DANC 1003, LARC 1003, MLIT 1003, MLIT 1003H, MLIT 1013, MLIT 1013H, MLIT 1333, THTR 1003, THTR 1013, or THTR 1013H.
- ² The Humanities Elective courses which satisfy General Education Outcomes 3.2 and 5.1 include: CLST 1003, CLST 1003H, CLST 1013, HUMN 1124H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, or PHIL 2103C.
- ³ One Social Science Elective should be selected from the following list of courses in order to satisfy General Education Outcomes 3.3 and 4.1: ANTH 1023, COMM 1023, HDFS 1403, HDFS 2413, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2103C.
- ⁴ The U.S. History or Government Elective courses which satisfy General Education Outcome 4.2 include: HIST 2003, HIST 2013, or PLSC 2003.
- ⁵ Recommend ACOM 3143, AGED 4003 or COMM 1313 to satisfy General Education Outcome 1.2. See academic adviser for complete list of Communication Intensive courses.
- ⁶ Students must complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with the academic adviser when making course selections.

³ The Humanities Elective courses which satisfy General Education Outcomes 3.2 and 5.1 include: CLST 1003, CLST 1003H, CLST 1013,

HUMN 1124H, PHIL 2003, PHIL 2003C, PHIL 2003H, PHIL 2103, or PHIL 2103C.

⁴ One Social Science Elective should be selected from the following list of courses in order to satisfy General Education Outcomes 3.3 and 4.1: ANTH 1023, COMM 1023, HDFS 1403, HDFS 2413, HIST 1113, HIST 1113H, HIST 1123, HIST 1123H, HIST 2093, HUMN 1114H, HUMN 2114H, INST 2013, INST 2813, INST 2813H, PLSC 2013, PLSC 2813, PLSC 2813H, RESM 2853, SOCI 2013, SOCI 2013H, or SOCI 2033.

⁵ The U.S. History or Government Elective courses which satisfy General Education Outcome 4.2 include: HIST 2003, HIST 2013, or PLSC 2003.

⁶ Recommend ACOM 3143, AGED 4003 or COMM 1313 to satisfy General Education Outcome 1.2. See academic adviser for complete list of Communication Intensive courses.

⁷ Students must complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with the academic adviser when making course selections.

test

Minor in Food Science (FDSC-M)

The Food Science Minor consists of 18 semester hours to include:

The following courses are required for a minor in Food Science:

FDSC 31003	Principles of Food Processing	3
FDSC 41202 & FDSC 41201	Food Microbiology and Food Microbiology Lab	3
FDSC 43004	Food Chemistry	4
and a minimum of 8 hours selected from the following courses (at least 5 hours must be 3000-4000 level coursework):		8
FDSC 11003	Introduction to Food Science	
FDSC 24001	Uncorked: Vines to Wines	
FDSC 240H1	Honors Uncorked: Vines to Wines	
FDSC 26003	The Science of Cooking	
FDSC 27001	Food for Health	
FDSC 32002	Introduction to Food Law	
FDSC 41103 & FDSC 41101	Food Analysis and Food Analysis Lab	
FDSC 44103	Sensory Evaluation of Food	
FDSC 47504	Engineering Principles of Food Processing	
NUTR 42103	Advanced Nutrition I	
Total Hours		18

A student planning to minor in food science must consult a Department of Food Science adviser.

Requirements for Certificate of Proficiency in Brewing Science

The Brewing Science Certificate of Proficiency is designed to provide students with a theoretical and practical introduction to brewing and fermentation. This certificate requires 15 credit hours.

Required courses 9

BIOL 47203	Laboratory in Microbial Fermentation	
or BREW 45	Production Design and Analysis of Beer	

FDSC 45203 Brewing Science
or FDSC
55203

Required internship, special problems, or honors research project - 3 hours ¹

Electives - Choose 6 hours from the following ² **6**

BIOL 20003	General Microbiology (ACTS Equivalency = BIOL 2004 Lecture)	
or BIOL 404	Prokaryote Biology	
BIOL 25473	Cell Biology	
or BIOL 23373	General Genetics	
CHEM 22673	Analytical Chemistry Lecture	
CHEM 26103	Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture)	
or CHEM 36203	Organic Chemistry II	
FDSC 24001	Uncorked: Vines to Wines	
or FDSC 240H1	Honors Uncorked: Vines to Wines	
FDSC 25203	Sanitation and Safety in Food Processing Operations	
FDSC 27401	Brewing Brilliance: Exploring the General Science of Fermented Beverages (Beer, Wine, and Spirits)	
FDSC 31003	Principles of Food Processing	
FDSC 41202	Food Microbiology	
FDSC 44103	Sensory Evaluation of Food	
BREW 45703	Production Design and Analysis of Beer	
or BREW 55	Production design and analysis of Beer	
CHEG 21303	Fluid Mechanics	
CHEG 31404	Heat and Mass Transfer	
BENG 31103	Measurement and Control for Biological Systems	
BENG 37303	Transport Phenomena in Biological Systems	
Total Hours		15

¹ **Internship** — Students could participate in an approved three credit hour internship with a brewing industry partner. A 3-credit hour internship should involve approximately 120-130 hours of work with the partner. The internship need not be completed in a single semester, although that is acceptable. At the end of the final semester of the internship, students would have to present a written and oral report of the work performed and lessons learned.

Special problems or research hours — Students could complete three credit hours working on a practical research problem under the supervision of a faculty member in food science, biology, chemistry, biological engineering, or chemical engineering. The topic of this work should be approved for relevance to the certificate before the work begins and reviewed if it changes substantially during the course of the work. Work that involves industry partners is particularly encouraged. At the end of the final semester of the work, students would have to present a written and oral report of the work performed and lessons learned. Credit hours and work done for an honors degree can satisfy this requirement, but if honors work is used, it must include at least one credit hour in three different semesters.

² To broaden the student's exposure to the skills needed in brewing and fermentation, for currently enrolled undergraduate students, at least one of these courses must be in a different department from the department of the student's major, and that course must also be outside of those already required for the student's major(s). If the student already holds

a degree, the course must be a new one outside of the previous degree program.

Faculty

Acuff, Jennifer C., Ph.D. (Virginia Tech), M.S. (Kansas State University), B.S. (Abilene Christian University), Assistant Professor, 2020.

Atungulu, Griffiths Odhiambo, Ph.D., M.S. (Iwate University, Japan), B.S. (Jomo Kenyatta University of Agriculture and Technology, Kenya), Associate Professor, 2013, 2019.

Baum, Jamie I., Ph.D., B.S. (University of Illinois-Urbana-Champaign), Associate Professor, 2011, 2018.

Crandall, Philip G., Ph.D., M.S. (Purdue University), B.S. (Kansas State University), Professor, 1989, 1997.

Gibson, Kristen Elizabeth, Ph.D. (Johns Hopkins University), B.S. (University of Central Florida), Associate Professor, 2012, 2017.

Hettiarachchy, Navam S., Ph.D. (University of Hull, England), M.S. (Edinburgh University, Scotland), B.S. (University of Madras, India), University Professor, 1992, 2006.

Howard, Luke R., Ph.D., M.S. (University of Arkansas), B.S. (Purdue University), Professor, 2002.

Lee, Sun-Ok, Ph.D., M.S. (Iowa State University), M.S., B.S. (Dongduk Women's University, South Korea), Associate Professor, 2008, 2016.

Morawicki, Ruben O., Ph.D. (Pennsylvania State University), M.Eng. (State University of New York-Buffalo), B.S. (Universidad Nacional de Misiones, Argentina), Associate Professor, 2006, 2016.

Seo, Han-Seok, Dr.rer.Medic. (Technische Universität Dresden, Germany), Ph.D., M.Sc. (Seoul National University, South Korea), B.S. (Korea University, Seoul, South Korea), Associate Professor, 2012, 2017.

Siebenmorgen, Terrence J., Ph.D. (University of Nebraska-Lincoln), M.S.Ag.E. (Purdue University), B.S.Ag.E. (University of Arkansas), Distinguished Professor, 1984, 2015.

Subbiah, Jeyamkondan, Ph.D. (Oklahoma State University), M.S. (University of Manitoba, Canada), B.E. (Tamil Nadu Agricultural University, India), Professor, 2019.

Ubeyitogullari, Ali, Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Middle East Technical University, Turkey), Assistant Professor, 2021.

Wang, Ya-Jane, Ph.D. (Iowa State University), M.S. (University of Minnesota-Twin Cities), B.S. (National Taiwan University), Professor, 1999, 2009.

Courses

FDSC 10101. Exploring Topics in Food Science. 1 Hour.

Introduces the depth and scope of Food Science as a profession. This course emphasizes the importance of science in processing and preservation of food and discusses current topics and issues. Practical information on food processing, composition, additives, labeling, environmental issues, regulations, safety, sensory analysis, and health benefits will be provided. Curriculum offerings in Food Science will be related to job responsibilities as a Food Scientist. Lecture/discussions, 2 hours per week for 8 weeks. (Typically offered: Fall)

FDSC 11003. Introduction to Food Science. 3 Hours.

This course is designed to provide students with a general application and understanding of current issues associated with food products and food ingredients. Discussions will focus on controversial subjects involving food products, food additives, food safety and preservation techniques based on scientific principles and popular belief. Lecture/discussions/demonstrations, 3 hours per week. (Typically offered: Fall and Spring)

FDSC 22001. The Science of Chocolate. 1 Hour.

The objective of this course is to introduce you to the science and technology of chocolate production. You will learn the history, chemistry, and physics of chocolate. This course will provide you with an understanding of chocolate production steps, including cacao bean harvesting, fermentation, drying, roasting, grinding, and manufacturing, and how these unit operations affect chocolate texture and flavor. Special focus will be given to fat and sugar crystallization, sensory evaluation, and sustainability of chocolate production. (Typically offered: Spring)

FDSC 220H1. Honors The Science of Chocolate. 1 Hour.

The objective of this course is to introduce you to the science and technology of chocolate production. You will learn the history, chemistry, and physics of chocolate. This course will provide you with an understanding of chocolate production steps, including cacao bean harvesting, fermentation, drying, roasting, grinding, and manufacturing, and how these unit operations affect chocolate texture and flavor. Special focus will be given to fat and sugar crystallization, sensory evaluation, and sustainability of chocolate production. Prerequisite: Honors standing. (Typically offered: Spring)

FDSC 24001. Uncorked: Vines to Wines. 1 Hour.

This introductory course is designed to provide students with an understanding of the basic concepts of growing grapes and winemaking, including history, grape growing, cultivars, chemistry, wine microorganisms, fermentation, winery operations, wine marketing, and the sensory and appreciation of wine. Coursework is expected to integrate lecture and guest presenters with supplement reading assignments. This course will not include wine tasting, therefore there are no age restrictions for enrollment. (Typically offered: Fall)

FDSC 240H1. Honors Uncorked: Vines to Wines. 1 Hour.

This introductory course is designed to provide students with an understanding of the basic concepts of growing grapes and winemaking, including history, grape growing, cultivars, chemistry, wine microorganisms, fermentation, winery operations, wine marketing, and the sensory and appreciation of wine. Coursework is expected to integrate lecture and guest presenters with supplement reading assignments. This course will not include wine tasting, therefore there are no age restrictions for enrollment. Prerequisite: Honors standing. (Typically offered: Fall)

FDSC 25203. Sanitation and Safety in Food Processing Operations. 3 Hours.

Topics covered will provide an understanding of the control of microbial, chemical, and physical food hazards as well as emerging food safety issues. Course will include a discussion of sanitation, cleaners and sanitizers, sanitary equipment and facility designs, and microbial growth and control in food processing operations. Lecture/discussion. (Typically offered: Spring)

FDSC 26003. The Science of Cooking. 3 Hours.

In recent years science has found its way into the kitchen and cooking into laboratories and food processing plants. This course is designed to integrate science and cooking to help students appreciate the chemical and physical properties of foods and understand how the processes used when handling, preparing, and storing foods affect these properties. (Typically offered: Fall)

FDSC 27001. Food for Health. 1 Hour.

The course is designed for students interested in how foods affect one's health. This course provides students with a background of functional food that will enable them to understand, discuss, and evaluate functionality of food in relation to health. This class is designed to appeal to students studying food science, nutrition, biology, chemistry, nursing, and health and human performance. (Typically offered: Spring)

FDSC 27401. Brewing Brilliance: Exploring the General Science of Fermented Beverages (Beer, Wine, and Spirits). 1 Hour.

This course is an introduction to the world of alcoholic beverages. Students will explore the general science, history, production, and cultural significance of beer, wine, spirits, and sake. Through presentations, readings, discussions, and tastings (of nonalcoholic products) students will gain a deeper appreciation for the complexity and diversity of these beverages. (Typically offered: Fall)

FDSC 31003. Principles of Food Processing. 3 Hours.

The course is designed as an overview of the unit; food processing operations common to all types of food processing plants. Examples will be drawn from international food processing operations processing fruits and vegetables, poultry and meats, and oil seeds and cereal grains. Emphasis on oral communication and critical thinking skills. Corequisite: Lab component. Prerequisite: CHEM 14203 and CHEM 14201 and (MATH 22003 or MATH 24004). (Typically offered: Fall)

FDSC 32002. Introduction to Food Law. 2 Hours.

Discussion of government laws and regulations affecting the manufacture of food. Emphasis is on federal regulations relating to food safety, labeling, and the FDA. Discussion relates to practical use of food law. Lecture 2 hours per week. (Typically offered: Spring)

FDSC 320H2. Honors Introduction to Food Law. 2 Hours.

Discussion of government laws and regulations affecting the manufacture of food. Emphasis is on federal regulations relating to food safety, labeling, and the FDA. Discussion relates to practical use of food law. Prerequisite: Honors standing. (Typically offered: Spring)

FDSC 4000V. Special Problems. 1-4 Hour.

Investigation of assigned problems in food science. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)

FDSC 41101. Food Analysis Lab. 1 Hour.

Laboratory exercises providing students with experience of analytical techniques and instrumentation used in food analysis. Laboratory 3 hours per week. Corequisite: FDSC 41103. Prerequisite: FDSC 43004 and CHEM 14203 and CHEM 14201 and CHEM 26103 and CHEM 26101 or (CHEM 36053 and CHEM 36001). (Typically offered: Spring)

FDSC 41103. Food Analysis. 3 Hours.

Methods of analysis, instrumentation, and laboratory techniques for measuring the chemical composition of raw and value-added products. Lecture 3 hours. Corequisite: FDSC 41101. Prerequisite: FDSC 43004 and CHEM 14203 and CHEM 14201 and CHEM 26103 and CHEM 26101 or (CHEM 36053 and CHEM 36001). (Typically offered: Spring)

FDSC 41201. Food Microbiology Lab. 1 Hour.

A hands-on laboratory course designed to teach students microbiological techniques and certain enumeration and plating techniques of specific food spoilage and pathogenic bacteria. Prerequisite: BIOL 20003 and BIOL 20001. Pre- or Corequisite: FDSC 41202. (Typically offered: Fall)

FDSC 41202. Food Microbiology. 2 Hours.

The study of food microbiology including classification/ taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Prerequisite: BIOL 20003 and BIOL 20001 or BIOL 25473. (Typically offered: Fall)

FDSC 43004. Food Chemistry. 4 Hours.

Water, carbohydrates, lipids, proteins, vitamins, and minerals in foods; biochemical and functional properties, enzymes, food additives (emulsifiers, pigments, colors, flavors, preservatives, and sweeteners) and texture as related to properties in food systems and during processing. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CHEM 14203 and CHEM 14201 and CHEM 26103 and CHEM 26101 or (CHEM 36053 and CHEM 36001). (Typically offered: Fall)

FDSC 4310V. Internship in Food Science. 1-4 Hour.

The Food Science Internship is a supervised practical work experience with a food industry, research program or governmental agency to gain professional experience and insight into career opportunities. Prerequisite: Junior standing and consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

FDSC 44103. Sensory Evaluation of Food. 3 Hours.

Principles and procedures for sensory evaluation of food. Appropriate uses of specific tests are discussed, along with physiological, psychological, and environmental factors affecting sensory verdicts. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: MATH 21003 or BUSI 10303 or STAT 28233 or PSYC 20103. (Typically offered: Fall)

FDSC 45103. Cereal Processing Technology. 3 Hours.

Fundamental concepts of heat and mass transport in grains; cereal/grain structure, property and composition; cereal/grain processing systems and technology; cereal/grain co-product processing technology and value recovery; cereal/grain quality metrics, grading standards and food safety assurance. Prerequisite: FDSC 31003 or FDSC 47504 or with instructor permission. (Typically offered: Spring Odd Years)

FDSC 45203. Brewing Science. 3 Hours.

The class is designed to give a thorough review of the biological and chemical processes involved in brewing beer and an appreciation for beer styles and flavors. Students will be introduced to industry professionals as well as employment opportunities that support the brewing industry from raw materials to packaged beer. Although not required, this course will be designed as a preparation course for students who may want to take an internationally recognized brewing exam/certificate such as the General Certificate in Brewing from the Institute of Brewing & Distilling (<https://www.ibd.org.uk/ibd-qualifications/brewing-qualifications/general-certificate-in-brewing/>). Prerequisite: (CHEM 14203 or CHEM 12103) and (BIOL 10103 or BIOL 10104). (Typically offered: Fall)

FDSC 47103. Product Innovation for the Food Scientist. 3 Hours.

This is a capstone course integrating knowledge developed in Food Science to the development of new food products. This course will take an integrated multidisciplinary approach to developing innovative food products and will provide learning experiences in new product development and Research & Development. Topics include product formulation, ingredient interactions, sensory analysis, packaging, labeling, food safety and food law. Corequisite: Lab component. Pre- or Corequisite: FDSC 41103 and FDSC 41101. Prerequisite: Senior standing, FDSC 43004, FDSC 31003, and FDSC 44103. (Typically offered: Spring)

FDSC 4720V. Special Topics in Food Science. 1-4 Hour.

Discussion focused on selected topics of particular fields of raw product physiology, food processing, chemistry, physiology, microbiology, evaluation, sensory analysis, and preservation. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

FDSC 47504. Engineering Principles of Food Processing. 4 Hours.

Basic mechanics of refrigeration, temperature controls, materials handling and mechanical problems as applied to foods and food processing. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 12003, MATH 24004, PHYS 20103, PHYS 20101 and FDSC 31003. (Typically offered: Spring)
